

Confirmation of compliance BSE/TSE-free and ADI-free

The Möller company hereby confirms that the materials we manufacture and supply do not contain any components of animal origin (ADI freedom) and are therefore free from risks associated with bovine spongiform encephalopathy (BSE) and transmissible spongiform encephalopathy (TSE).

By ADI (Animal Derived Ingredients), we mean all substances, materials, or processing aids that originate wholly or partly from animal sources. These include, in particular, animal fats, proteins, oils, waxes, gelatin, collagen, enzymes, and other derivatives of animal origin.
Such substances are not used in our materials.

The raw materials and preliminary products we use are based exclusively on synthetic, mineral, or polymer starting materials. Our suppliers confirm that these raw materials are not of animal origin and do not come into contact with animal components. This means there is no risk of contamination with BSE or TSE-relevant materials.

Note:

This confirmation refers exclusively to the materials used by us. We do not currently have complete documentation for processing aids; therefore, no ADI or BSE/TSE freedom can be guaranteed for these.

This declaration applies to the following product groups:

- ElaQprem elastomer grades
- Imported elastomer grades
- Foamed materials
- Asbestos-free fiber materials
- Graphite materials
- Rubber steel gaskets
- PTFE virginial / PTFE 25% glass

For other product groups, a corresponding assessment can be carried out on request.

revision	02
date	09.02.2026
signature	This letter has been generated automatically and is valid even without a signature.
validity	This confirmation is valid until revoked. It will be reviewed regularly and updated immediately as soon as new findings from our supply chain or changes to the relevant regulations make this necessary.

This confirmation of compliance applies to Möller Industrietechnik GmbH and Möller-Metalldichtungen GmbH. Both companies use a common material compliance structure, identical supply chain assessment processes, and centralized supplier communication. The contents of this confirmation of compliance have been independently verified for both legal entities and apply equally to both.
