

Confirmation of compliance PAK (AfPS GS 2019:01 / AfPS GS 2014:01)

For selected materials, we carry out assessments to ensure compliance with the requirements of AfPS GS 2019:01 and, for older tests, AfPS GS 2014:01.

The basis for this is:

- Supplier confirmations,
- external test reports in accordance with AfPS GS 2019:01 or AfPS GS 2014:01,
- as well as our own tests carried out by independent testing laboratories.

The classification of the tested materials into the respective categories of the AfPS specifications may vary depending on the material type, batch and test method. Due to these natural fluctuations and the different test benches, we do not confirm any fixed categorisation, but only compliance with PAH conformity in accordance with the test standard specified on the data sheet.

This means that for all materials whose data sheet contains the note 'PAH compliant', we confirm compliance with the relevant limit values of the standard specified in the data sheet.

For materials without this note, we do not have sufficient evidence, so we cannot confirm PAH compliance for them.

Note on the test reports published on our website:

The test reports provided there serve exclusively as examples of tests that have been carried out. The categories shown therein refer to the individual sample tested in each case and do not constitute a binding statement that this category is permanently maintained or applies to all batches of the material. The statement of conformity is based solely on the information provided in the respective data sheet.

The currently valid data sheets are available on our website and are continuously updated.

Please do not hesitate to contact us if you have any further questions or specific application requirements.

approved by	Möller-Industrietechnik GmbH / Möller-Metalldichtungen GmbH Brunnenweg 10, 39444 Hecklingen
revision	01
date	18.02.2026
signature	This letter has been generated automatically and is valid even without a signature.
validity	This confirmation is valid until revoked. It will be reviewed regularly and updated immediately as soon as new findings from our supply chain or changes to the relevant regulations make this necessary.

This confirmation of compliance applies to Möller Industrietechnik GmbH and Möller-Metalldichtungen GmbH. Both companies use a common material compliance structure, identical supply chain assessment processes, and centralized supplier communication. The contents of this confirmation of compliance have been independently verified for both legal entities and apply equally to both.
