

Confirmation of compliance Freedom from phthalates

As part of our ongoing quality assurance and in response to increasing demands for material transparency, we are happy to provide you with information about the use of phthalates in our products.

1. Phthalate-free materials used

The materials, substances and formulations we use for technical seals, elastomers, plastics and fibre materials are formulated according to current knowledge without the use of phthalates (phthalic acid esters).

This applies in particular to substances regulated in the EU, such as:

DEHP
DBP
BBP
DIBP

and other phthalates listed in international regulations.

Based on the information provided to us by our suppliers and our internal material approvals, our materials are considered phthalate-free.

2. Restriction: No assessment of auxiliary and process materials

Please note that we do not carry out a complete assessment or documentation of auxiliary materials, process aids or temporary input materials used in production.

These materials are not part of our material approval process, are not systematically recorded and therefore cannot be assessed or confirmed with regard to phthalates.

A phthalate-free assessment therefore refers exclusively to the materials and formulations used, but not to:

Lubricants, release agents or auxiliary materials
Cleaning or maintenance chemicals
Temporary process aids
Production-related contact materials that are not part of the end product

3. Up-to-date and accurate

All information is based on the information available to us from our supply chain and our internal processes. We continuously monitor regulatory developments and update our assessments accordingly.

For further requirements or specific applications, we will be happy to assist you within the scope of the available information.

approved by	Möller-Industrietechnik GmbH / Möller-Metалldichtungen GmbH Brunnenweg 10, 39444 Hecklingen

signature	This letter has been generated automatically and is valid even without a signature.
validity	This confirmation is valid until revoked. It will be reviewed regularly and updated immediately as soon as new findings from our supply chain or changes to the relevant regulations make this necessary.

This confirmation of compliance applies to Möller Industrietechnik GmbH and Möller-Metалldichtungen GmbH. Both companies use a common material compliance structure, identical supply chain assessment processes, and centralized supplier communication. The contents of this confirmation of compliance have been independently verified for both legal entities and apply equally to both.
